SHAYNE MARTIN

Full stack software engineer with background in e-commerce and payments

I have over 5 years experience in e-commerce software engineering. I leverage deep customer knowledge as a small business owner along with an approachable attitude to deliver authentic feedback and pragmatic solutions in order to drive product development that meets business goals and satisfies customer needs.

SKILLS

Languages: Javascript/NodeJS, C#/.NET Core, Ruby, HTML, CSS

Databases: PostgreSQL, MSSQL, DynamoDB

Frameworks/Libraries: Angular 2 & 4, React, Express, jQuery, Bootstrap

Tools/Software: Git, TFS, Visual Studio, Adobe Suite

EXPERIENCE

Capital One (Spark Pay) – Software Engineer

MAY 2012 – PRESENT

- Worked on a team that scoped and built the front end application of a new user enrollment platform that handles merchant identity verification and underwriting
- Developed a RESTful reporting API to identify last known contact with users to ensure compliance with spam regulations
- Executed an automated migration of users off of a legacy system to help ensure successful PCI DSS Level 1 validation and reduce operational costs
- Integrated with 3rd party API's for domain registration and SSL purchasing on merchant's behalf

Texas Beard Company – Co-founder, Software Engineer

FEBRUARY 2014 – PRESENT

- Operationalized and automated order fulfillment for certain product lines resulting in X% cost reduction
- Created tools to increase efficiency in launching new product lines thereby reducing time-to-launch measured in days instead of weeks
