SHAYNE MARTIN

Full stack engineer with **6 years experience** in e-commerce and payments. As a **mental health advocate**, I am passionate about using my skills to make a positive impact in users' lives and on the world through my **approachable attitude** by delivering **authentic feedback** and **pragmatic solutions** that drive product development to **meet business goals** and **satisfy customer needs**.

SKILLS

Languages: Javascript/NodeJS, C#/.NET Core, HTML, CSS, Ruby

Databases: PostgreSQL, MSSQL, DynamoDB

Frameworks/Tools: Angular 2, React, Express, jQuery, Jenkins, Git

EXPERIENCE

Capital One (Spark Pay) — *Software Engineer*

MAY 2012 – PRESENT

Worked on teams of various methodologies and sizes, including agile teams from 3 to 15 members, in both the Spark Pay Online Store and In-Person divisions. Roles included **front-end engineer** and **full-stack engineer** with direct involvement in **technical sales** for client-facing projects, **independently defining and developing** solutions to business needs for internal projects, as well as **mentoring junior engineers**.

- Scoped and built the **front-end architecture** of a new user enrollment platform that handles merchant **identity verification** and **underwriting**
- Scoped CI/CD pipeline of enrollment platform using **Jenkins** for push-button deployment as the first product in division to **launch in AWS** in production
- **Identified requirements** from stakeholders and **independently developed a RESTful API** and consuming application to identify last-known contact with users to ensure **compliance with spam regulations**
- Executed an automated migration of users off of a legacy system as an essential task for **successful PCI DSS Level 1 validation**
- Integrated with **third-party APIs** for domain registration and SSL purchasing on merchants' behalf

Texas Beard Company — *Co-founder, Software Engineer*

FEBRUARY 2014 – PRESENT

Along with 3 partners, I helped found and grow Texas Beard Company — an e-commerce business specializing in beard care products. We made **$500k+ in revenue** in the first year and experienced **100% revenue growth** during the second year.

- **Automated order fulfillment** of product lines, resulting in up to **40% cost reduction** while minimizing business risk of launching new product lines
- Scoped and built internal tooling to increase efficiency in launching new product lines, **reducing time-to-launch to days instead of weeks**
